

ABSTRACT OF THE DISCLOSURE

1 Data transmitted from a data transmission server  
2 1 to a certain user arrives at a network gateway 2 via  
3 an internet 100, and is received in an arrived data  
5 receiving means 31 of an arrived data dealing function  
6 part 3 provided in the inside. Then, a data arrival  
7 information determining means 32 determines the data  
8 arrival information type on the basis of the type of  
9 terminal of the pertinent user as stored in an individual  
10 user terminal type memory 33, a data arrival information  
11 editing means 34 edits data arrival information on the  
12 basis of the data received by the received data and data  
13 arrival information type, and a data arrival information  
14 transmitting means 35 transmits data arrival information  
15 to the terminal used by the user. The transmitted data  
16 arrival information arrives at a user terminal 4 via a  
17 radio network 200.
